Residential And Commercial Landscape Services

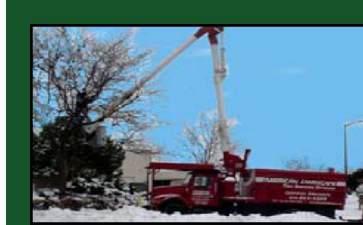

Total Grounds Management

Grounds Management is an important facet that is often neglected. Your landscape is a large living investment. Properly managed, it contributes to the value, beauty and usefulness of your property. From tree and shrub care to turf care, our programs balance the various needs of your landscape to deliver exceptional results. Under our professional care, your property value will increase with each passing year.

Tree Science & Service

Plant Management, including tree removal, corrective pruning, tree and shrub fertilization, insect and disease control is vital to maintaining the value of your investment. Our staff of certified professionals will evaluate your site and take the most environmentally sensitive approach to ensure the health of your plants all year long. Call American's tree specialists for all your tree care needs...as always our estimates are complimentary.

Hardscape & Specialty Features

Hardscaping is the foundation of your landscape project, including unique retaining walls, creative walkways, functional driveways and decorative features. With your help we will select either natural or manufactured materials that will complement your landscape project. Water features bring soothing sounds and visual interest. Exterior lighting allows you to enjoy your landscape after the sunsets.
